

SAFEGUARDING TRAVEL AND TRADE

AIRPORT SECURITY EQUIPMENT DEPLOYMENT AND MAINTENANCE

From aviation checkpoints to security services, Leidos is a global leader—developing and delivering advanced, automated technology solutions for customers around the world. Our capabilities facilitate secure, efficient passenger movement and enhance passenger experience through fast, frictionless, fully integrated services in airports worldwide.

OUR EXPERIENCE

Leidos has a 22-year performance history in original equipment manufacturer (OEM) agnostic checkpoint installation, integration, commissioning and decommissioning across the 400+ U.S. federalized airports. From the deployment of checkpoint upgrades across the U.S. immediately after 9/11 under the Strategic Airport Security Rollout (SASR), through the enhancements under Security Equipment Systems Integration (SESI), Transportation Security Equipment Deployment Services (TEDS), and most recently the Checkpoint Screening Equipment Deployment Services (SEDS) and numerous commercial airport efforts, Leidos has repeatedly proven our ability to adapt and respond to challenges associated with all complexities of checkpoint deployment projects.

This experience in supporting more than 10,000 individual deployment projects at every federalized airport in the U.S. has provided Leidos with optimized processes that do not impact the passenger experience, useful data, practical lessons learned, valuable working relationships, and most importantly, a team with unmatched experience deploying 100% of TSA's currently fielded checkpoint and checked baggage screening equipment. This equipment includes recent additions to TSA's Qualified Products List such as Checkpoint Property Screening Systems (CPSS) and the latest Credential Authentication Technology (CAT) and passenger screening units. Additionally, our teams provide full system integration services for Capability Acceptance Process (CAP) projects including Third-Party testing services using TSA-approved testing providers.

As the prime contractor for the Transportation Security Administration's (TSA) Checkpoint Integrated Logistics Support (ILS) program for more than a decade, Leidos works seamlessly with checkpoint OEMs to provide comprehensive preventative and corrective maintenance for all checkpoint equipment. This rich history working with TSA, coupled with our years of experience as a trusted partner for commercial airports, places our team at the forefront for Transportation Security Equipment (TSE) deployment, testing, and maintenance.

Performance proof points:

- Deep federal experience with responsibility for checkpoint equipment deployment across more than 450 airports and TSA locations
- Completed 10,000+ security checkpoint and checked baggage deployments with consistent, innovative approach
- Responsible for preventive and corrective maintenance for all checkpoint security equipment for more than 10 years

OUR CAPABILITIES

Like TSE deployments that Leidos performs on SEDS, the TSE deployment efforts for commercial entities can range from simple equipment relocation to large, multi-lane deployments that include site surveys, concept, Issued for Construction (IFC) and as-built designs, permit approval, site preparation, installation, test support and site restoration. Efforts with commercial entities can also include equipment procurement, witness testing, warranty, corrective and preventative maintenance.

Our OEM agnostic, full life-cycle approach includes:

- Site Surveys
- Concept Drawings
- Issued For Construction (IFC) Drawings
- Statements of Work
- OEM and Deployment Schedules
- Site Preparation
- Training
- Equipment Installation
- Third Party Testing
- Deployment Closeout
- Warranty
- Ongoing Preventative and Corrective Maintenance

ABOUT LEIDOS

Leidos is a Fortune 500® innovation company rapidly addressing the world's most vexing challenges in national security and health. The company's 47,000 employees support vital missions for government and commercial customers. Headquartered in Reston, Virginia, Leidos reported annual revenues of approximately \$14.4 billion for the fiscal year ended December 30, 2022.

“On behalf of Newark Liberty International Airport’s Redevelopment Team, I thank the Leidos team for their hard work, professionalism and dedication to help successfully deliver the Security Screening Checkpoint’s 14-lane CPSS network online with remote screening in EWR’s new Terminal A.”
